positive pre-qualification

EXPOSURE OF THE SITE AND THE SET-UP

moderate

3 signals detected
Non-compensatory index: it takes the maximum.

Project ready to be appraised

The rarest and most favourable case. The next step on the journey is stage E1 — Decide: a pre-feasibility study and a reasoned viability opinion.

Your answers reveal 3 exposure signals. We are not telling you here which: that is what the full opinion is for.

What the full opinion contains

- Your score in detail, section by section, and what cost you points.
- WHICH exposure signals were detected, and what they concretely produce on your project.
- The risk analysis for your field, ranked by criticality.
- A conclusion and recommendations sorted by horizon — what to deal with before any commitment.
- Reviewed and validated by an XP-NOVA expert, delivered within 48 h.

What next? The journey in four steps

1 · You have just done it

The mini-assessment, free and immediate.

2 · You unlock

Online payment, by card or mobile money.

3 · An expert reviews

Your opinion is checked and annotated by an XP-NOVA engineer.

4 · You receive

The full opinion as a PDF, within 48 h, ready to present as it stands.

This mini-assessment is computed automatically from your declarations; nothing has been verified on site, and it has not been reviewed by an expert. The full opinion always is, before it is sent.
